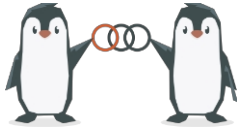
OSS Strategy



Anti-Trust Policy Notice

- Linux Foundation meetings involve participation by industry competitors, and it is the Linux Foundation's intention to conduct all its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of—and refrain from participating in—any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

- Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are set out in the Linux Foundation Antitrust Policy, available at http://www.linuxfoundation.org/antitrust-policy. If you have any questions regarding these matters, please contact your company's legal counsel. Alternatively, if you are a member of the Linux Foundation, please feel free to contact Andrew Updegrove of Gesmer Updegrove LLP, the firm that provides legal counsel to the Linux Foundation.

Antitrust Policy

- The participation of companies that are competitors within the industry is essential for Linux Foundation (hereinafter referred to as ‘LF’) meetings. The LF conducts all its activities in accordance with all applicable antitrust and competition laws. It is therefore of the utmost importance that meeting attendees ensure that meetings proceed in accordance with the agenda and take care not to engage in any activities prohibited under domestic or international antitrust and competition laws.

- Examples of prohibited conduct at LF meetings and in connection with LF activities are set out in the LF Antitrust Compliance Policy, available at https://www.linuxfoundation.jp/antitrust-policy/. If you have any questions regarding these matters, please consult your company’s legal counsel or, if you are an LF member, contact Andrew Updegrove of Gesmer Updegrove LLP, the LF’s legal counsel.

Chatham House Rules

- Adherence to Chatham House Rules
  - Recording is not permitted
  - Information received may be shared as meeting notes, but without revealing who said it
- Chatham House Rules

Code of Conduct

- We operate in accordance with the Code of Conduct set out by The Linux Foundation Japan
  https://www.linuxfoundation.jp/code-of-conduct/
- **Unacceptable Behaviour (Excerpt)**
  - **No form of harassment is tolerated**, including, but not limited to, harassment based on gender, gender identity, gender expression, sexual orientation, disability, appearance, physical characteristics, race, age, religion, **or any other** protected status or position under the laws of the country or region where the conference or programme is held.
  - Furthermore, the use of abusive, offensive, or humiliating language; threats; stalking; harassing photographs or recordings; inappropriate physical contact; sexual images; and unwelcome sexual advances or requests for sexual favours are also considered harassment.
  - Participants who are asked to cease harassing behaviour must comply with that request immediately.

    Witnesses or victims of unacceptable behaviour should immediately notify the conference organisers.
- **Incident Response (Excerpt)**
  - If a participant is involved in harassment, the conference organisers will take whatever action is deemed appropriate under the circumstances, including issuing a warning to the offender or expelling them from the conference.

OSS Strategy & Hosting: Introduction to Our Activities

Last updated 2024/10

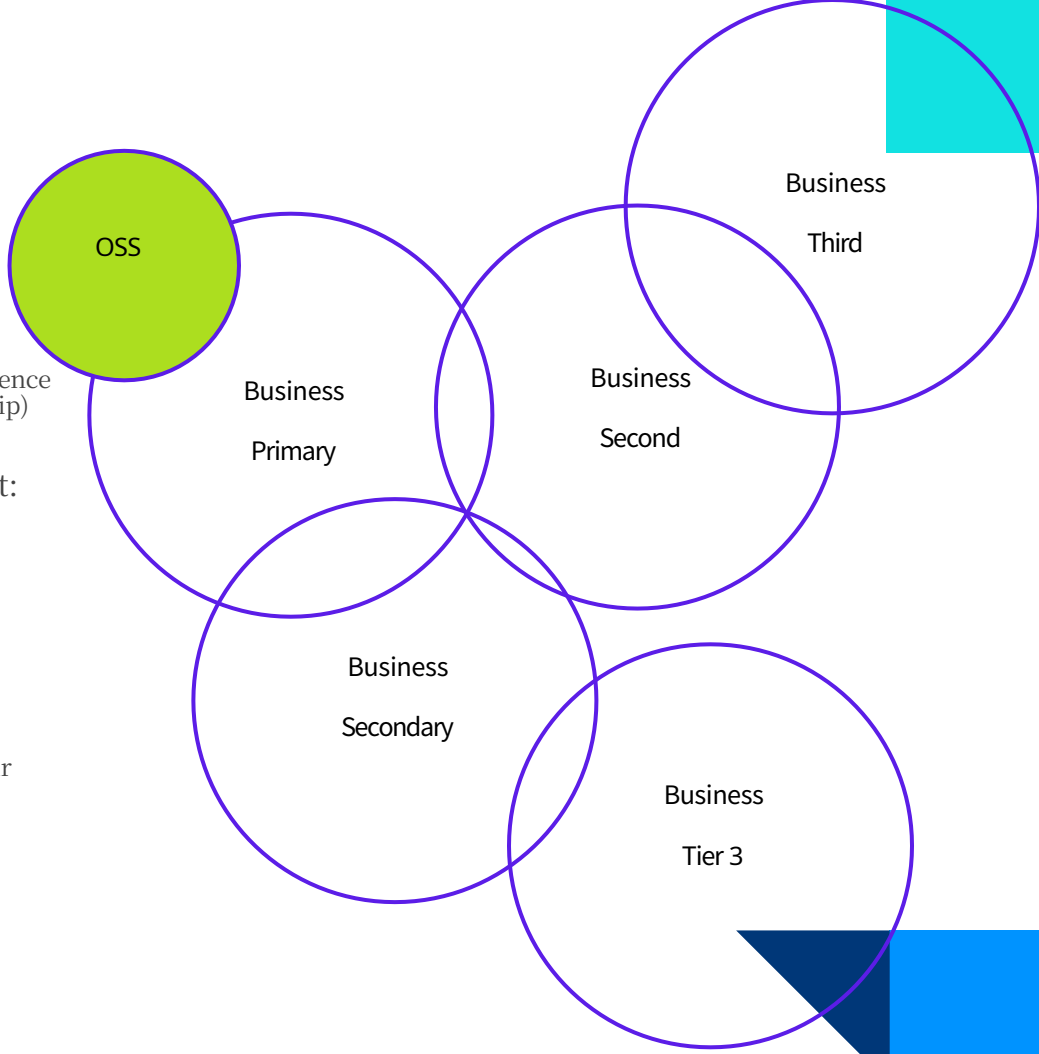
THE LINUX FOUNDATION

OPENCHAIN

TODO

OSS Strategy & Hosting

- OSS Business Strategy and Our Company's hosting
  - To aim for a stage beyond mere OSS usage and licence compliance (participation, contribution and leadership)
- Businesses close to OSS and those distant from it: considering the relationship and discussing challenges
  - OSS is essential to business
  - OSS itself does not generate profit
  - Profit is generated through the utilisation of OSS
  - Visualising these relationships enables us to justify our commitment to OSS



THE LINUX FOUNDATION OPENCHAIN TODO

OSS Strategy & Hosting

- Motivation
  - A sense that there is a barrier to moving from mere usage to the next stages (participation, contribution, leadership)
- Anticipated Challenges
  - It is difficult to see a clear path or role models for moving from usage to contribution
  - Wouldn't it be helpful to have a more concrete OSS strategy to draw upon?
  - Although 'Your OSPO is not my OSPO', surely there must be commonalities and best practices across the industry and business sectors, even amongst individual OSPOs
- Presentation of concrete examples for reference
  - Introduction of typical examples for each industry and sector
  - Mutual presentation of OSPO initiatives by various companies via Lightning Talks (consideration for future Meetups)

OSS Strategy & Hosting

- Identifying the challenges faced by companies (target audience) that utilise OSS in their business operations
  - Linux distribution vendors
  - Consumer electronics vendors
  - System integrators
  - Telecom operators
  - Automotive manufacturers
  - Semiconductor vendors
  - Web service companies
  - Universities and research institutions
  - Corporate R&D departments
  - Local authorities and public bodies
- The required OSS contribution activities are largely the same
- However, the degree of impact on business varies for each activity

	Common
Business Overview	
Desired Outcomes from OSS	
Initiatives to Achieve Our Objectives	- Recruitment - Communication - OSS:Talent Assessment? Fostering a Culture?
OSS Activities to Be Implemented	High Priority

THE LINUX FOUNDATION OPENCHAIN TODO

OSS Strategy & Hosting (Common)

	Common
Business Overview	A wide range of industries
Desired Benefits from OSS	- Interoperability - Expanding and developing markets (increasing the potential customer base) - Open innovation (generating new value and ideas) - Cost sharing (reducing costs per company) (From the user's perspective: avoiding vendor lock-in)

Initiatives to achieve these objectives	Standardisation → As expected of a high-level stage, the tasks and standards required are demanding
	- Participation in and leadership of OSS communities
	  - Example: Joint Development Foundation: C2PA (standard) (the CAI OSS implementation is not LF)
	  - CNCF and OpenInfra have clear criteria for donating OSS projects and for stage progression (CNCF incorporates best practices)
	  - (It would be helpful to have a practical guide indicating which foundation is best, or a classification of the characteristics and approaches of each foundation)
	- Participation in and leadership of OSS implementations
	- Communication

OSS activities to be undertaken	High priority

OSS Strategy & Hosting Persona Case Studies (in progress)

	Linux Distribution Vendors	Consumer Electronics Vendors	System Integrators	Telecom Operators
Business Overview	Sales of Linux technical services	Product sales	System contracting and solutions Development	Provision of Telecommunications Services
What we seek from OSS The primary objective	To promote our own distribution, and strengthening	Efficient product development and support enhancement	Efficiency from development to operation and maintenance up	In the transition to the era of OSS-based Software-Defined technologies, ensuring quality Ensuring quality and safety
To achieve this objective Initiatives	・Expanding the user base ・Strengthening of distribution ・Project sustainability Ensuring Vendor Neutrality	・Support for standard interfaces Support ・Streamlining product development (experience in building high-performance /Support for short-term development) ・Realising long-term product support	・Establishment of a line-up of DX solutions Strengthening ・Experience in system development ・Strengthening our presence ・Reducing costs through the use of OSS ・Make it easier to secure orders	・Establishing industry standards (Standardisation) ・Ensuring vendor-neutral Current ・Realisation of long-term product support
OSS activities to be implemented	High priority - Submitting patches - Participate in regular community meetings (GB, AB, TSC)	High priority - Reporting bugs - Create an issue - Presentation of use cases - Research and Evaluation and Selection Should this be added?	High Priority - Patch Submission - Maintainer - Bug reporting - Create an issue Should this be added? - Sponsorship initiatives (difficult to justify unless linked to business strategy. Essentially, securing a position is necessary, and to do so, a stronger presence is required,	High priority - Report a bug - Create an issue - Case Study Presentation - Finding peers in the community (Finding business partners) - To achieve standardisation - JDF exists for the realisation of standardisation and

TODO

OSS Strategy & Hosting: Persona Case Studies (in progress)

	Automotive Manufacturer	Semiconductor Vendor	Web Services Companies
Business Overview	Automotive Manufacturing and Sales	・Expanding sales of manufactured chips such as LSIs and SoCs	Web service development and provision
The primary objective Objective	In the transition to the era of Software-Defined , ensuring quality and safety Ensuring quality and safety within a massive supply chain	Enabling our proprietary LSIs to be used on OSS platforms	Realising efficient service provision and operation of the service platform
Initiatives to achieve these objectives	・Establishing industry standards (standardisation) ・Achieving vendor neutrality ・Ensuring long-term product support	・Contributing our proprietary LSI drivers to the upstream ・Promotion of solution development communities that utilise LSI functions ・Promotion of the development community	・Optimisation of cloud maintenance costs
OSS activities to be implemented	High priority - Reporting bugs - Issue registration - Sharing use cases - Recruiting members within the community (finding business partners) (Searching for business partners) (On hold: I'd like to hear from people in the automotive industry) (On hold: Does contributing to OSS (e.g. kernel LTS) and providing regular reports improve the sustainability of OSS?)	High priority - Patch submission - Maintainer (patch review, etc.) - Bug reporting - Issue creation - Presentation of use cases For example, by enhancing the software necessary to run products—such as Linux drivers for the company's own semiconductors—this can indirectly lead to increased sales of the company's products. (Example: Intel: adding support code for its own semiconductors to the Linux kernel in near real time) In fact, a lack of Linux support can be a reason for a product not being adopted, so this serves as motivation driven by fear	Priority: Medium - Patch Submission - Bug reporting - Attend regular community meetings (GB, AB, TSC) - Sponsored

OSS Strategy & Hosting Persona Case Studies (in progress)

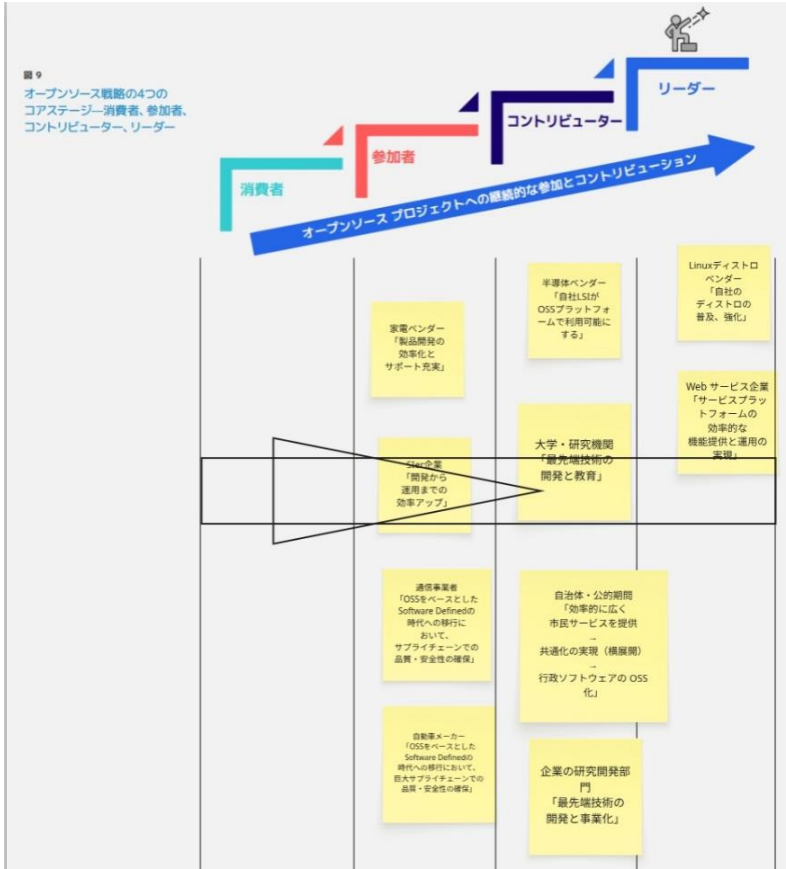
	Universities and Research Institutions	Corporate R&D Departments	Local Authorities and Public Bodies
Business Overview	Publication of Research Findings and Raising Awareness	Publication of Research Findings and Application to Business	Provision of public services
The primary objective regarding OSS	Development of Cutting-Edge Technology and Education	Development and Commercialisation of Cutting-Edge Technologies	Providing citizen services efficiently and widely → Achieving standardisation (horizontal roll-out) → Making administrative software open source
Initiatives to achieve the objectives	・Publication of academic papers (followed by presentations at OSS events) ・Education through contributions to OSS	・Publication of academic papers (followed by presentations at OSS events) ・Incorporating feedback through contributions to OSS	・A framework, such as guidelines for OSS utilisation, is required ・Establishing and revitalising OSS communities (OSS hosting) ・Promotion of insourcing between local authorities
OSS activities to be implemented	High priority - Meetup presentations - Presentation of use cases - Recruiting members (seeking business partners) - Building a local community - Technical training - Training in OSS development methodologies	High priority - Meetup presentations - Presentation of use cases - Recruiting colleagues (seeking business partners) - Building a local community	High priority - Establishment of common standards - Formation of local communities

OSS Strategies for Each Case Study: Classification into Four Stages (U

Review)

10 April Notes

- Before classification: ‘When there is no OSS’ → “When OSS is present” – how has it changed would be helpful
  - What benefits emerged before and after
  - Which state is the right one for climbing the OSS ladder?



THE LINUX FOUNDATION OPENCHAIN TODO
