Key News Around ISO/IEC DIS 18974

Overview

- We expect to complete the Draft International Standard (DIS) process via JTC-1 at the end of June.
- There will be an editorial period after this.
- According to Seth from Joint Development Foundation:

"We will most likely end up passing with edits. We will clean up the editorial things but nothing technically normative and send it back. They will spend another month transposing the final version and give us the ISO number."

Questions?

Conformance Continues With De-Facto Standard

ISO/IEC 5230 One Pager Updated

By Shane Coughlan | 2023-03-09 | Featured, News

The ISO/IEC 5230 one page overview has been updated to provide simple, clear messaging about how and why the International Standard for open source license compliance provides value to companies in the supply chain.

This document is available in [PDF format](#), [PNG format](#) or [InDesign format](#). You may take it, use it, share it and remix it freely using the terms of the [CC0 license](#), effectively public domain.

You can help us improve this document, translate it and convert it into new formats through the [OpenChain GitHub Reference Library](#). We are actively seeking a MarkDown version for ease of future iteration.

OpenChain Project One Slide Overview Updated

By Shane Coughlan | 2023-03-10 | Featured, News

The one slide overview of the OpenChain Project has been updated to provide simple, clear messaging about how and why our work provides value to companies in the supply chain.

OpenChain Reference Library – Complete Overhaul

By Shane Coughlan

2023-02-24

Featured, News

The OpenChain Reference Library has been significantly updated to improve navigation. This is an administrative item that was pending for a while. Its completion should make it possible (and easy!) for anyone to access our library and find material. It should also make it a lot easier for our Education Work Group to assess and improve or expand existing material.

General Community News: Project Activities

GPLv2 Compliance Flowcharts Updated

By Shane Coughlan | 2023-04-13 | News

The OpenChain Project GPLv2 Compliance Flowcharts have been updated. Originally published in the book [Practical GPL Compliance](#), these flowcharts are intended to help address some common compliance workflows. Thanks to Jacob Wilson, they have been moved into MarkDown format, and can now be easily added to websites, elearning platforms and more.

Example: Flowchart #0 – How Do I Distribute

You can access and download these flowcharts in our Reference Library. Like the rest of our material, they are released under CC-0 licensing.

OpenChain Webinar #51 – An Update On ClearlyDefined

By Shane Coughlan | 2023-04-26 | News, Webinar

OpenChain Webinar #51 featured an update on [ClearlyDefined](#) by Nick Vidal at the Open Source Initiative (OSI). A lot has happened since we last covered this project for open source metadata, including the move to a new home at OSI.

OpenChain @ Legal and Licensing Workshop 2023 –
Gothenburg, Sweden – 2023-04-21

By Shane Coughlan | 2023-04-21 | News

The OpenChain Project was featured at the FSFE Legal and Licensing Workshop 2023 held in Sweden during April. This annual event brings together legal experts from around the world to discuss open source and open-related legal matters.

OpenChain @ OSCAR Open Source Supply Chain Salon (OSCAR开源供应链沙龙) – 2023-04-03

By Shane Coughlan | 2023-04-04 | News

CAICT and OpenChain held an OSCAR Open Source Supply Chain Salon on the 3rd of April 2023 with ISO/IEC 5230 third-party conformance announcements from:

OpenChain @ 2nd China Automotive Cyber Security and Data Security Conference 2023

By Shane Coughlan | 2023-04-20 | News

OpenChain Project has been featured at the 2nd China Automotive Cyber Security and Data Security Conference 2023 in a talk delivered by Zhang JunXia of CAICT. This is part of our long-running collaboration with CAICT to help companies of all sizes in the Chinese market to adopt and use ISO/IEC 5230, the international standard for open source license compliance.

Licensing and Security Specification Editing

- The editing process is continuing as expected, with solid feedback on issues, and changes heading in the direction of improved clarity.
- The open and closed issues are tracked via GitHub:
Licensing: <https://github.com/OpenChain-Project/License-Compliance-Specification/issues>
Security: <https://github.com/OpenChain-Project/Security-Assurance-Specification/issues>
- The draft next generation specifications are also hosted on GitHub:
Licensing: <https://github.com/OpenChain-Project/License-Compliance-Specification/blob/master/3.0/en/openchain-license-compliance-3.0.md>
Security: <https://github.com/OpenChain-Project/Security-Assurance-Specification/blob/main/Security-Assurance-Specification/2.0/en/openchain-security-specification-2.0.md>
- As are the slides used for every meeting (two meetings per month):
<https://github.com/OpenChain-Project/Meeting-Minutes/tree/main/Slides>

We Are Going To Help Procurement Even More

Announcing The OpenChain Legal Work Group

By Shane Coughlan | 2023-03-31 | News

The OpenChain Project is launching a Legal Work Group with a focus on a regular industry request: model provisions for agreements.

- Companies have asked for templates with simple language to support the use of ISO/IEC 5230 or ISO/IEC DIS 18974 in procurement agreements or contracts.
- The model provisions would explore options for requesting or explaining ISO/IEC 5230 or ISO/IEC DIS 18974.

This work group will provide a forum to do that with a particular focus on **choice, translation** and **global applicability**.

<https://www.openchainproject.org/news/2023/03/31/announcing-the-openchain-legal-work-group>

Model Language For Procurement

- The first meeting of the Legal Work Group took place on the 25th of April 2023.
- We explored model provisions for including OpenChain ISO/IEC 5230 and OpenChain ISO/IEC DIS 18974 (and potentially other standards) in procurement contracts or similar material. The goal is to ensure people can understand options. We will not be prescriptive, and these model provisions will remain part of the OpenChain reference material. They will not be included in the standards themselves.
 - The call started by looking at model provisions done before via the [Risk Grid](#).
 - The document, under public domain, has been [moved to the OpenChain GitHub](#) for ease of access and editing.
- Our outcome was to use this basic format to structure our first round of model provisions, and to have the option of merging the documents in the future.

Literally Today...

OpenChain and FSFE bring you REUSE.software Specification 3.0 as CC0

By Shane Coughlan | 2023-05-17 | News

In 2017 the OpenChain Project and FSFE collaborated to make a CC0 version of the REUSE.software Specification 1.0 available for everyone to integrate into their organization processes and business logic. The goal is to eliminate any friction in leveraging this mechanism for better software management.

We are pleased to announce the REUSE.software Specification 3.0 is now available as CC0. You can access it via the OpenChain GitHub:

<https://github.com/OpenChain-Project/Reference-Material/blob/master/General-Compliance-Support-Material/REUSE.software/en/REUSE.software-3.0.md>

Updated OpenChain Conformance Badges

By Shane Coughlan | 2023-05-17 | News

The OpenChain Project provides the global community with conformance badges. These allow organizations to easily show they have an OpenChain Standard-Related Program.
